

SWISS GOLD GLAZE

Presentation

Swiss Gold Glaze is born from the expertise of an exceptional restorer, responsible among others for the restoration of the Federal Government Building in Bern, and the experience of an architect and designer known for its innovative work combining technical excellence and authenticity. We offer custom made solutions for the construction industry and property development, where quality, innovation and design are priorities. For both indoor and outdoor projects, our product can be applied to all materials. Even on wood, our solution brings a new dimension to lighting and it has been proven to ensure unprecedented fire retardant effectiveness.

Application :

Swiss Gold Glaze is a mineral glaze, a paint, a stuck formed by an aqueous dispersion of quartz sand, with a polychromatic finish. Used as a mineral base for indoor and outdoor coatings. With its consolidating process, it turns into the same body, insoluble in water and highly breathable by its inorganic base. Its main function is to unify and sublimate the material.

Our solution is unique in the field of decoration. The most prestigious knowhow of the ancient world is revisited and adapted to the aesthetics of the contemporary world. Swiss Gold Glaze offers a different brightness than conventional decorative coatings and has unmatched results in the field of decoration, the rendering is sumptuous. The material is noble and in order to fully meet your expectations and requirements it is a sustainable protection. The shades, colors and pigmentations are endless, we create for each project a unique sample, the color of your personality.

SWISS GOLD GLAZE

Combining the best of tradition and modernity

Swiss Gold Glaze can be applied on any surfaces, it provides higher brightness, great flexibility, hydrophobicity and strength. Swiss Gold Glaze is the most suitable ecological coating for both indoor and outdoor projects.

This product is 100% natural and allows great versatility for high requirement works. Swiss gold Glaze is obtained from raw mineral materials. Free from harmful substances such as biocides or plasticizers. Swiss Gold Glaze coatings meet high quality standards, being the perfect solution for facades, decoration and embellishment, walls and ceilings. Construction practices focused on building eco-sustainability and health improvement are encouraged with Swiss Gold Glaze. It provides efficient protection and environmental standards for buildings. Swiss gold glaze can be applied to several substrates including concrete, porous surfaces, other paints, plaster and stone. There is no coating known with as much properties as Swiss Gold Glaze

Healthy environments :

SGG is harmless and non-toxic. It is a pure mineral compound. It is for this reason that SGG is totally suitable for people who suffer from chemical sensitivity. Its use is recommended for enclosed spaces, hospitals, nurseries, nursing homes, hotels, offices and showrooms. Swiss Gold Glaze has a longer lifespan than synthetic paints due to its unique composition, giving it much more enduring and flexible properties.
